A device for banknotes and coins.

## RS Money Scales

## For every business sector

Banks | Supermarkets | Petrol stations | Bakeries | Pharmacies | Hotels | Restaurants | Retail stores and a lot more

### Short facts:

- Cashing-up in just one minute
- Easy and self-explanatory operation guidance
- Save up to 10 minutes per cashing-up
- Print all results quickly

One for everything.  
The RS Money Scales count banknotes and coins.

### RS Money Scales

The daily manual cashing-up of a shop requires valuable labour time. The RS 1000 and RS 1200 Money Scales carry out a cashing-up in only one minute. The scales are mobile and, due to their adjustable display, the counting procedure can be done either standing up or sitting. The Money Scales are easy to use because of the self-explanatory instructions. The scales indicate automatically the sort of coin/banknote to be placed, from

1 cent to 500 Euros. There is no need to press any button during the entire counting procedure. The subtotals are added automatically into a total sum. Besides from banknotes and coins, the RS 1200 also counts coin rolls trouble-free. This version offers the possibility to calculate the float amount and deduct it from the cash receipts. The connection to a receipt printer allows a clear print-out of the cashing-up.

Adjustable display with background light and self-explanatory operation guidance.

#### Float function:

The RS 1200 can be set up for any desired float amount. The value is automatically deducted from the cash balance, displaying only the actual revenues.

The RS 1200 recognizes each coin roll automatically. Put different coin rolls on the scale and count them in just one step!

Cashing-up in just one minute!

## Technical data
